### What's New in the AutoCAD?

Software Connectivity: This month's new software features include improved software connectivity, the ability to support network workgroups, file organization for organizational workflow, and more. Support for Network Workgroups: With network workgroups, you can share your drawings with remote users across a network and open each drawing separately. This has never been easy, but AutoCAD now includes a built-in network viewer that can quickly open, compare, and copy drawings directly from any browser-based network viewer, like Explorer.
